2. On the morning of 10 September, the undersigned met with the following named personnel to discuss the possible application of the magic paint on Project assigned aircraft. The main purpose of this meeting was to brief and explain the problem to the two NCR reps, as they will be responsible for developing the specs for this paint. After the initial discussions, [REDACTED] had some drawings made that depict the areas of high temperature and, therefore, areas where the magic paint could not be used on the U2R. Copies of these drawings are available in SAS/OSA. The next step in the evaluation of the NCR's paint will be for the NCR reps to ascertain if their paint can meet, in addition to the change of color, the normal specs that are required of any other paint used on the U-2's.
